# Special Order

## Customized Order Entry in Sage BusinessWorks

BSoft's Special Order gives you an order entry screen built for customization, all the components of the BusinessWorks order screen and much, much more!

Special Order is capable of formatting and attaching a special tag to an order or a line item; for example you may want a disclaimer attached to a specific part

**Reduced customer lock-out!** Because Special Order is not locking the customer while the order is being entered, customer lock-out occurs

### Get a head start on Customer specific pricing!

We already have contract pricing; start using it now! When the feature becomes available in BusinessWorks we will merge your data.

### If improved order entry efficiency is your goal! We have put

the entire order on one screen and allow line items to be edited in the grid!

### If you have special tags or rules for certain line items!

only for a split second while order is posting in BusinessWorks.

**Additional features!** Special order has the capability to select a default sales representative for each specific workstation, "in-field" quantity editing, entry of miscellaneous charges and/or deductions, and printing to multiple printers at the same

or even warranty information. With Special order you can have what you want, when you want it! It is also capable of using these tags to customize the printed output for things like kit consolidation.

time.

**This software requires some custom development so make sure to plan ahead!**

### CHALLENGE

Effectively enter orders that require special documentation from one screen, without customer lockout.

### SOLUTION

Install BSoft's Special Order

### RESULTS

An efficient order entry screen that meets your needs; customer specific pricing, reduced customer lockout, special tags, and kit roll-up option.
